

Part D for residents in long-term care facilities

ISSUE: In 2019, about three percent of Part D enrollees lived in nursing homes, and their prescriptions accounted for 5 percent of spending before rebates and postsale discounts. Relatively little is known about how well Part D has served these beneficiaries.

KEY POINTS: Staff will present findings based on the perspectives of 29 stakeholders and experts on long-term care pharmacy interviewed in late 2020 and the spring of 2021.

ACTION: Commissioners will discuss the material.
